Switching example: 5TT4 101-0

1-phase lighting circuit with 230 V AC actuation, e.g. in office buildings

Switching example: 5TT4 122-0 with central ON/OFF switching

With the 2-pushbutton central "ON" and "OFF" function, all remote control switches can be switched on or off from a central point, e.g. at the start and end of work. A time switch with a one-second pulse can also be used if desired. Once a central on/off switching operation has been executed, the remote control switches can also be switched on and off locally at any time. The phase relation of ZA, ZE and A1 is arbitrary.
