

Product Data Sheet

DB650R

650 Series auxiliary relay base

General

The DB650R is a relay base that provides two volt-free contacts for use in 2 or 4 wire control systems and other applications. It should only be used with the Series 650 wide operating voltage range of detectors. The base incorporates two sets of voltage free contacts that change state when the detector signals an alarm.

Standard Features

- For use with 4 wire control systems
- Automatic door closers
- Volt-free relay contacts
