Line Sharing 1-to-4 parallel RJ45 hub
DIN-rail mountable
ABI-ET2008S00

abitana

✓ 5 RJ45 parallel-coupled ports
✓ One incoming phone line distributed to 4 handsets
✓ One incoming line distributed unfiltered to handsets and modems
✓ Works for POTS/ADSL/VDSL/Vectoring lines
✓ High impedance audio splitter

This module allows parallel coupling of four devices onto a single incoming link.

All pins of the top RJ45 jack are copied 1 to 1 (in parallel) to the pins of four front RJ45 jacks. (i.e. all RJ45's are put in parallel on an internal 8-line bus.

Can be used to put several high impedance devices in parallel.
Do not use for Ethernet, video or TV applications
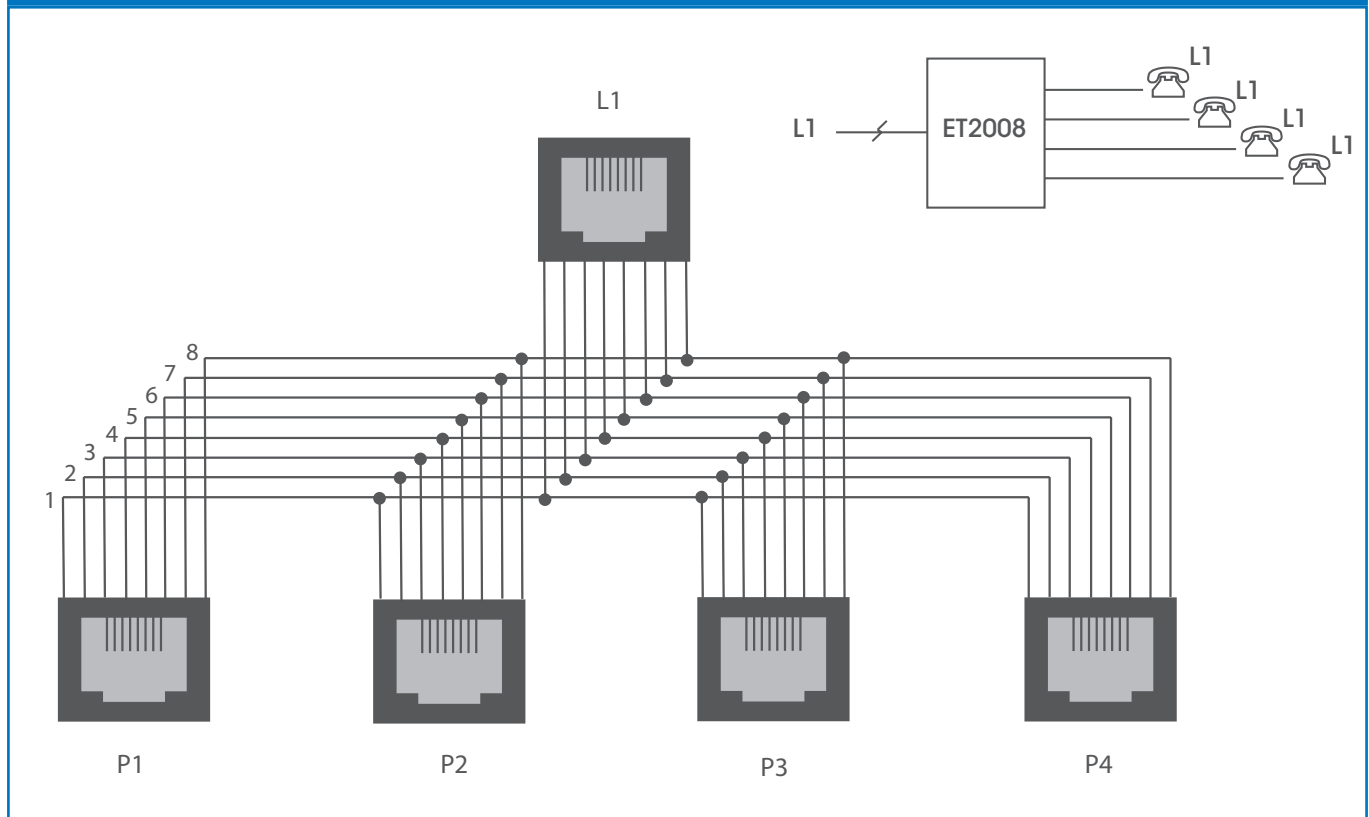

CHARACTERISTICS

Complies with:
• ISO/IEC 60603-7, connector
• ISO/IEC 11801, structured cabling
• EN 50173, structured cabling
• ISO/IEC 15018, residential cabling

Dimensions:
• WxHxD (mm): 71,2x80x65 (4 standard positions wide)
• Net weight: 210g
